About Us

Arctangent Engineering Ltd is a trusted, highly respected engineering company that strives to provide state-of-the-art solutions for clients across many industries. With years of experience and expertise in the field, we specialize in innovative and reliable engineering services ranging from design consulting to fabrication and installation. With a strong commitment to innovation and quality, our team of professionals are focused on delivering only the best products and services. Our dedication to customer service ensures that each project is completed with the utmost care and attention to detail.

We are into the production and distribution of all kind of chemicals for high performance concrete and waterproofing. Our waterproofing products are absolutely out-standing. Never you look else where when it comes to waterproofing materials for plaster-screeding, concreting, tiling, retaining wall, swimming pools, stamped concrete etc. Our **Block saver 40/50** for block molding is out standing out there. It gives you high **quality blocks, zero break breakage, extra strength and extra blocks.**

At Arctangent Engineering Ltd, we strive to exceed your expectations in every way possible - from the quality of our engineering services to the reliability and accuracy of the results produced. We invite you to take advantage of all the benefits we have to offer, and thank you for choosing us as your engineering partner.

We look forward to meeting all your engineering needs and building a strong relationship with you. If there is anything we can do to make this process smoother, please do not hesitate to contact us at any time. Welcome aboard!

Our architects use the latest softwares to give you 3D walk-through designs. which enables you to experience your buildings & interior designs digitally.

Blocksaver 40/50 Liquid Polymer

Block saver is a chloride free water reducing admixture supplied as a brown solution which instantly disperses in water. Block saver disperses the fine particles in the mortar mix, enabling the water content of the mortar to perform more effectively and improving the consistency of the mortar. This produces higher levels of workability for the same water content, allowing benefits such as water reduction and increased strengths to be taken.

ADVANTAGES;

Allows specified strength grades to be met at reduced cement content or increased workability.

Water reduction significantly improves compressive strengths at all ages and enhances durability through the production of low permeability mortar.

Minimizes the risk of segregation and bleeding and assists in the pro-

Why Choose us ?

We work with you;

As the top engineering company in Abuja and Nigeria at large, we'll work with you on your project, large or small. Together we'll fine-tune your new construction, remodeling or renovation plans, incorporating the desired designs and specifications.
